# Fully Integrated and Turn-key Industrial Wastewater Treatment Systems.

Single-source provider of air and water pollution control equipment designed to reduce risks, costs and hassles.

**We seamlessly integrate market-proven water treatment technologies into robust and effective treatment trains.**

## Expertise

No “magic bullet” or single product handles each industrial wastewater’s specific needs.

Anguil has the experience to navigate a variety of technologies targeting challenging contaminants. With 30+ engineers on staff, we can help you evaluate and select the right treatment system to meet all your needs.

## Fully Integrated

Anguil’s flexible approach results in a technology selection process tailored to each application.

Our expertise across multiple abatement technologies allows us to deliver a fully integrated, turn-key system that seamlessly integrates into your process.

## TECHNOLOGIES

Anguil’s technology agnostic approach delivers the most cost-effective system to meet your treatment needs.

**Total Dissolved Solids**  
RO Systems, Softening Systems

**Dissolved Metals**  
pH Adjustment, Ion Exchange, Carbon

**VOCs**  
Air stripping, GAC, Oxidation

**Soluble BOD//COD**  
MBR, Oxidation

**Suspended Solids**  
Bag Filters, Ballasted Flocculation, Cartridge Filters

**Fats, Oils/Grease**  
O-W Separators, DAF

**Sludge Dewatering**  
Rotary Vacuum Drum, Rotary Fan Press

## SERVICES

Anguil provides as much or as little scope of work as you require.

- Project Development and Execution capabilities from system design through lifetime service
- New and retrofit systems, service, parts and maintenance on any system
- Anguil has its own **on-site Wet Lab** for bench and pilot testing of a variety of treatment technologies. We can also provide in-situ pilot testing.
- Engineering services including engineering and treatability studies, equipment selection assistance, spec writing, drawing creation, and equipment expert for PHA meetings
- Project management, parts procurement, quality assurance, installation, commissioning, field service
