Fully integrated and turnkey Remediation Systems.

Single-source provider of air and water pollution control equipment designed to reduce risks, costs and hassles.

All mission-critical aspects are done in-house to ensure a quality system is delivered on time and on budget.

Reduce Headaches
Single source provider

Creative Solutions
Technology agnostic approach

Flexible Options
Pilot, field tests, and rentals

Lifetime Service Partner
Lowest cost of ownership

Durability

- We've delivered over 250 treatment systems for halogenated waste streams
- Some halogenated systems in service for **over 20 years and counting!**

Mobility

Have it your way — fixed skid or trailer mounted, with or without extraction blower, available for purchase or rental.

Flexibility

Our technology agnostic approach ensures creative solutions and best overall total cost of ownership. Flexible fuel system options including Electric, LPG, Natural Gas or Diesel Fuel Input.

Safety

Our equipment meets all safety requirements for Bulk Terminals and hazardous environments (including C1D2 rated areas).

Each remediation application has its own unique challenges. Our systems are designed to withstand the conditions at the most difficult Brownfield or Superfund sites.

TECHNOLOGIES

We take a technology agnostic approach, leveraging market proven technologies and integrating them into the right system for you.

- Thermal and catalytic oxidizers
- Air Sparge
- Soil Vapor Extraction (SVE)
- Vapor Intrusion
- Strippers
- Dual- and Multi- Phase Extraction
- Pump and Treat
- Scrubbers
- Ozone and more...

Capacity: New or Used, Thermal and/or Catalytic Oxidizers ranging from 100 SCFM to 100,000 SCFM.

SERVICES

Anguil provides as much or as little scope of work as your firm requires.

- Capabilities from system design assistance through lifetime service of your system
- New and retrofit systems, service and maintenance on any system
- Technology agnostic approach
- Bench and pilot testing, rentals available
- Project Management, Procurement, Quality Assurance, Installation, Commissioning, Service

Years in Clean Air and Water
