

Standard Services: for ANY Oxidizer System

Anguil has almost three decades of experience servicing thousands of oxidizers of all makes and models.

MAINTENANCE & OPTIMIZATION

Anguil's two most popular services are the **Preventive Maintenance Evaluation (PME)** and the **Oxidizer System Operating Cost Review**.

The **PME** is a thorough audit of your system's operation covering multiple days and an extensive checklist. Upon completion you will receive an evaluation report detailing our recommendations for improving performance, reliability and safety.

Focused on reducing your energy consumption, the **Anguil Operating Cost Review** is a specialized evaluation designed to save you money. This custom report will summarize the options available to you for reducing system operating costs and provide detailed estimates for the implementation of these upgrades.

ADDITIONAL SERVICES OFFERED

- Emergency Service & Troubleshooting Visits
- Remote System Evaluation via Modem
- VOC Destruction Efficiency Checkups
- Onsite or Offsite Operator Training Sessions
- Emergency or Routine Replacement Parts
- Recommended Spare Parts Packages
- System Upgrades

Anguil offers all of these services and more on *any make or model oxidizer system!* Programs can be purchased individually or grouped into a custom designed service plan.

24-Hour Service Hotline (800) 488-0230

Specialty Services: Get the most from YOUR Oxidizer System

Expert technicians are on duty and ready to help with the precise technical information you need, and fast delivery of parts from our well-stocked inventory. Oxidizers are what we do. No Oxidizer project is too big or too small.

RTOs / RCOs

- Ceramic Media Retrofits
- Insulation Replacement
- Diverter Valve Repairs
- RTO to RCO Conversion
- Bake-out Feature Upgrades
- Fuel Injection Upgrades

THERMAL OXIDIZERS

- Heat Exchanger Repairs
- Expansion Joint Repairs
- Insulation Replacement
- Heat Recovery Projects
- Thermal to Catalytic Oxidizer Conversion

Retrofit

Repair

CATALYTIC OXIDIZERS

- Catalyst Testing
- Catalyst Regeneration
- Catalyst Replacement
- Heat Exchanger Repairs
- Heat Recovery Projects

CONCENTRATORS

- Media Regeneration
- Media Replacement
- Customize Desorption Control for your Process
- Expand Oxidizer Capacity with Concentrator Upstream
- Reduce Oxidizer Operating Cost with Concentrator

Replace

Relocate

Anguil experience and service - powerful allies in protecting your investment.

Why Anguil Service?

Experience you can **TRUST**

Service for Your Investment. Your Air Pollution Control System represents a significant investment in both initial capital and ongoing maintenance and operation. **Anguil offers the most complete selection of post-installation services** - allowing you to get the most from your investment, over the entire life of the system.

Environmental and safety regulations are continuously changing, and chances are your business is evolving as well. Whatever upgrades you need for your air pollution control system, trust Anguil to:

- Improve VOC Capture & Destruction
- Increase Airflow Capacity
- Reduce Operating Expenses
- Achieve Greater Reliability
- Enhance Documentation & Reporting Capabilities

Anguil has the necessary experience and expertise to help meet your goals.
